OBJECTIVE

To gain knowledge about organisational techniques with skilled Programming Languages and sound communication.

EXPERIENCE

- 24 Jan, 2022 -
- **Front End Developer**  
Accenture  
I am currently working on Bausch Project.  
I have collaborated with my team and created a beautiful dashboard with help of HTML, CSS and Bootstrap 4 and JS.  
My role here was to design and develop the front end part and contribute to the creative part of website and create an efficient website.

EDUCATION

- 2018-2021
- **Maulana Abul Kalam Azad University of Technology**  
Bachelor of Computer Applications  
1st sem- 6.89 2nd sem- 8.83 3rd sem- 8.60 4th sem- 10 5th sem- 9.67 6th sem- 9.68
- 2017
- **Indira Gandhi Memorial High School**  
Higher Secondary Education(CBSE)  
61.8%
- 2015
- **Bidhan School, Durgapur**  
Secondary Education (ICSE)  
78.2%

SKILLS

- HTML 5
- CSS
- Bootstrap
- JavaScript
- Custom WordPress

PROJECTS

- **Online Car Rent Site**  
This was my college project which I made in my graduation along with other members.  
I used HTML, CSS, Java Script, PHP.
- **Bausch E-Commerce Platform Enhancement**
  - Project Duration: January 2022 - May 2023
  - Project Overview:  
The Bausch E-Commerce Platform Enhancement project was a high-profile initiative undertaken by Accenture for Bausch, a leading global eye health company. The primary objective of the project was to revamp and enhance our existing e-commerce platform to deliver an exceptional user experience and increase online sales of our eye care products. As a frontend developer, I played a pivotal role in the project, contributing to the design, development, and optimization of the user interface (UI) to create a seamless and visually appealing shopping experience for customers.

- Responsibilities and Contributions:

1. Requirement Analysis and UI/UX Design Collaboration:

I collaborated closely with the UX designers and business stakeholders to understand the project requirements and translate them into a comprehensive UI design plan. This involved wireframing, prototyping, and presenting design concepts for feedback and approval.

2. Frontend Development and Technology Stack:

Using my expertise in frontend development, I implemented the UI design using modern technologies such as HTML5, CSS3, and JavaScript frameworks using React.js and Vanilla js. I ensured that the website was responsive and accessible across various devices and browsers.

3. Performance Optimization:

Recognizing the significance of performance in the e-commerce domain, I actively participated in optimizing the website's loading speed and overall performance. Techniques like lazy loading, code splitting, and image optimization were employed to enhance user engagement and conversion rates.

4. Continuous Improvement and User Feedback:

During the project lifecycle, I participated in regular team meetings to discuss progress and gather feedback from end-users and stakeholders. Based on this feedback, I made necessary refinements to enhance the UI and improve the overall user experience.

- Achievements:

1. Successfully delivered a fully enhanced and user-friendly e-commerce platform that surpassed the client's expectations.

2. Received accolades from the client for my dedication, technical expertise, and proactive approach to problem-solving.

- Conclusion:

As a frontend developer on the Bausch Project, my contribution played a vital role in transforming their e-commerce platform into a cutting-edge solution that boosted online sales and established Bausch as a prominent player in the eye health industry. My expertise, collaborative spirit, and commitment to excellence made a lasting impact on the success of the project and further strengthened Accenture's reputation as a reliable technology partner.
